Profile Summary

B.Tech Computer Science and Engineering student graduating in **2027** with strong fundamentals in **Data Structures & Algorithms, OOP, DBMS, Operating Systems, and Computer Networks**. Proficient in **C++** with **200+ DSA problems** solved on LeetCode and GeeksforGeeks. Built software applications using **React.js, Node.js, Express.js, MongoDB, SQL, and REST APIs** through personal projects, open-source contributions, and hackathons.

Technical Skills

Languages: **C++**, JavaScript (ES6+), Python, SQL.
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Framer Motion, Recharts.
Backend & DB: **Node.js**, **Express.js**, **REST APIs**, **MongoDB**, MongoDB Atlas.
Core CS: **Data Structures & Algorithms**, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks.
Tools: Git, GitHub, VS Code, Vercel, Render.

Projects

Swag-e-Swaad – Food Ordering Platform | *React, Node.js, Express.js, MongoDB, JWT, Razorpay* Live | GitHub

- Built a **MERN**-based food ordering app with **menu search, customization, cart, coupons**, and REST APIs.
- Added **JWT authentication**, **bcrypt password hashing**, and **role-based access** for users and admins.
- Integrated **Razorpay** and **Cash on Delivery** with backend **payment and order validation**.
- Added an **AI food assistant** and **admin dashboard**; deployed using **Vercel, Render, and MongoDB Atlas**.

Finance Dashboard UI | *React, Tailwind CSS, Recharts, Framer Motion, Context API* Live | GitHub

- Designed an interactive dashboard with Recharts to give users a clear visual breakdown of income and expenses.
- Used Context API to manage global state, allowing instant search, sorting, and pagination across transaction lists.
- Implemented data persistence using localStorage for dark mode preferences and added a CSV data export feature.
- Improved page performance using lazy loading and memoization to reduce unnecessary re-renders.

Interactive Wall Calendar | *React, Tailwind CSS, Framer Motion, date-fns* Live | GitHub

- Created a dynamic digital calendar supporting fluid drag-based date selections and full keyboard shortcuts.
- Handled note management using localStorage, enabling persistent data saving without a backend.
- Polished the user experience with smooth Framer Motion event indicators and responsive utility-first CSS layout.
- Reduced UI lag during high-frequency dragging actions for smoother calendar interactions.

Experience

Open Source Contributor May 2024 – Aug 2024
GirlScript Summer of Code (GSSoC) *Remote*

- Resolved high-priority GitHub issues by analyzing **complex open-source codebases** for bug fixes.
- Refactored production-ready components while strictly following **project architecture and Git workflows**.
- Initiated comprehensive **Pull Requests (PRs)** and efficiently resolved maintainer **code-review feedback**.

Education

United College of Engineering and Research Naini, Prayagraj
B.Tech in Computer Science and Engineering *2023 – 2027*

Dharmavaati Manav Uthan Inter College Handia, Prayagraj
Higher Secondary (XII) *2022*

Dharmavaati Manav Uthan Inter College Handia, Prayagraj
Secondary (X) *2020*

Achievements & Activities

- Solved **200+ DSA problems** across LeetCode and GeeksforGeeks, maintaining a consistent coding streak.
- Secured a **99.50 percentile** in the Young Turks 25 Core CS and DSA National Competency Assessment.
- Completed **IBM SkillsBuild (MERN Stack)** certification and the **IBM PBEL Internship**.
- Shortlisted for **UHack 3.0** and submitted a tech model for **Smart India Hackathon 2025**.
